

# Concord Summer Experience

<b>Activity Title</b>	Recycling		
<b>Activity Overview</b>	In this activity, you will create a sustainable model building out of items which otherwise would have been thrown away.		
<b>Activity Duration</b>	10 minutes researching or drawing a building design  50 minutes creating the model	<b>Resources Required</b>	<ul style="list-style-type: none"> <li>➤ Unwanted household items</li> <li>➤ Art supplies – glue, sellotape, paint, scissors</li> </ul>
<b>Activity Summary</b>			
<p>Create a model of a sustainable building.</p> <p>The building could be anything you are interested in – a house, school, hospital, sports centre, library, science laboratory.</p> <p>Try to include features which make your building sustainable – solar panels for energy, good insulation to stop heat loss, no plastic inside.</p> <p>Please do not buy any resources specifically for this task. Only use items which you already have in your house that were going to be thrown away or that you don't use/want anymore.</p> <p>Include a poster or plaque alongside your model to explain how it is sustainable and why your model is more environmentally friendly than throwing away the resources used.</p>
