

Concord Summer Experience

Activity Title	Research		
Activity Overview	In this activity, you will research a famous Scientist from your country and why their contributions to Science are so important.		
Activity Duration	20 minutes researching 40 minutes presenting the information	Resources Required	<ul style="list-style-type: none"> ➤ Internet access ➤ Pen and paper or a word document
Activity Summary			
<p>Make a poster about a famous Scientist from your country who discovered something, built something or contributed towards developing something which is still useful now to where you live and helping your country become as excellent as it is today.</p> <p>The Scientist could be an engineer, an explorer, a chemist, a doctor, a biologist, an astronomer, a computer genius.</p> <p>You can present the information about the famous Scientist in many different ways. You can make a poster, write a newspaper article, film a breaking news clip, create a plaque for a museum which goes next to a piece of work, make a lesson to teach someone about this person, write a history book. The more creative way to present the information the better.</p> <p>Your Scientist can be male or female, past or present, well known or yet to be famous. Choose someone who what they have achieved or discovered or built is important to you and where you live.</p>
